

Veliform

AI that runs your business

Presentation date: 2026-07-28

Founder: Josef Shainskiy

Production: veliform.com · veliform.com/hq

Slide 1 — Company goal

Mission	Build AI that works for the business — not chatbots, but an organization of agents with names, roles, and tools
Tagline	<i>AI that runs your business</i>
For customers	24/7 phone coverage, orders, bookings, lead capture, SEO, marketing ops
For Veliform	Recurring SaaS revenue on Voice (now) and WeOffice (next)

One-line thesis: Small businesses lose money on missed calls and manual ops. Veliform replaces that with AI agents at a fraction of human cost.

Slide 2 — What we sell (3 product lines)

Product	Slug	Status (Jul 2026)	Revenue model
Veliform Voice	veliform-voice	Live pilot (invite-only)	B2B subscription per business line
Veliform Company Site	veliform-company	Live	Lead gen → Voice / WeOffice sales
WeOffice	agent-company-saas	Building (MVP v2)	B2B SaaS — hire automation agents

4 repos · 3 commercial products · 1 meta registry

meta/ veliform-landing/ voice/ agent-company/

Slide 3 — Veliform Voice (main revenue engine)

Three non-overlapping lines

Line	Who pays	What they get	Deploy
Business Platform	B2B owner	AI receptionist 24/7 — orders, leads, handoff	business-server (Railway)
Personal	Owner	Alice (assistant) + Secretary (call screening)	personal-server (Railway)
Voice Copilot	Sales / HR / RE	Live hints in Telegram during real calls	copilot-server (planned)

Live numbers (prod)

Asset	Value
-------	-------

Slide 4 — Launchpad promise (Voice GTM)

Spec date: 2026-07-27 · Owner: Veliform Product

Build your AI receptionist. Your first test call in five minutes.

Step	Time target	Status
Enter website URL	~30 sec	Spec complete
Auto-generate agent draft	~2 min	Building
Browser test call	~2 min	Partial (WebRTC exists)
Phone activation	Manual (pilot)	Invite-only concierge

Company objective (Launchpad): Prove 2 different business tenants through 1 repeatable onboarding by end of Phase D.

Pilot today: No public billing · no self-signup · concierge onboarding only.

Slide 5 — Customer ROI (why they pay)

Problem → math

Pain	Industry benchmark	Veliform answer
Missed after-hours call	1 lost order / lead per week	Rose answers 24/7
Part-time receptionist	\$1,500–3,000/mo (varies by market)	AI line subscription
SEO + marketing ops	Freelancer \$500–2,000/mo	Automation agents (WeOffice)

Example florist (demo tenant Rose)

1. Customer calls at **23:00** → AI takes order

Slide 6 — Veliform Company Site (funnel)

Prod URL: veliform.com · Vercel project `porqa`

Surface	Agent	Purpose	Status
<code>#architect</code>	AI Architect	Lead qualification + expertise demo	Live
SEO layer	SEO Agent	Sitemap, JSON-LD, agent-skills	Active
Traffic ops	Marketing Analyst	GA4 + Search Console monitoring	Beta
Internal	HQ dashboard	Org map, roster, activity (30s poll)	Live since 2026-07

Slide 7 — WeOffice (next SaaS revenue)

Idea captured: Jul 2026 · Prod preview: agent-company-navy.vercel.app

Open your AI company → hire automation agents → monitor on dashboard

MVP milestone (documented target)

KPI	Target	Deadline style
Paying design partners	1	Before GA
OR beta orgs	10 orgs × 2+ agents × 30 days	Before GA

MVP version ladder

Version	Deliverable	Status
v0	Local demo UI	✓ Done

Slide 8 — AI organization today (11 agents)

Source: `ceo/org.yaml` · Updated 2026-07-27

Status	Count	Agents
Live / Active	7	Rose, Alice, Secretary, SEO Agent, AI Architect, CEO Steward, GitHub CI
Beta	3	HR Copilot, Marketing Analyst, Finance Analyst
Planned	1	Maya (real estate)

5 departments: Product · Engineering · Marketing & SEO · Operations · Finance

1 human: Josef Shainskiy (Founder / CEO)

Slide 9 — Automation schedules (ops at scale)

Agent	Frequency	Output cap
Marketing Analyst	2× daily (05:00, 17:00 UTC) + weekly Mon 06:00 UTC	≤ 1 ClickUp task/day · ≤ 3/week + 1 Notion update
Finance Analyst	Every 2 hours + weekly Mon 07:00 UTC	Telegram alert on anomaly only
GitHub CI	Every push to <code>main</code>	1 CEO Update per deploy
HQ dashboard	Poll Notion every ~30 sec	Live product board + activity

Marketing alert thresholds

- Min baseline sessions: **20** before anomaly fires
- Traffic drop trigger: **≥40%**

Slide 10 — Infrastructure cost (Jul 2026)

Finance Analyst monitors Railway first (Vercel / Twilio / OpenAI later)

Threshold	USD	Action
Hobby included credit	\$5/mo	Baseline plan
Estimated bill warn	$\geq \$8$	Telegram alert
Estimated bill critical	$\geq \$15$	Telegram alert
Voice project share warn	>65% of workspace spend	Review voice-agent project

Burn pace warn: > 1.35× expected for billing period

When customer billing goes live → Stripe revenue tracked; Finance Analyst roadmap includes Stripe.

Slide 11 — Revenue model (planned pricing structure)

Note: Public pricing TBD. Structure below follows product architecture + MVP specs.

Product	Unit	Indicative model	When
Voice Business	Per tenant / phone line	Monthly subscription + usage (minutes)	After Launchpad GA
Voice Personal	Per owner line	Monthly subscription	After Launchpad GA
Voice Copilot	Per seat / vertical	Monthly + per-minute cap (30 min)	Phase copilot-server
WeOffice	Per org	Stripe plans + per-agent limits	MVP v4

Near-term revenue gates

Slide 12 — Timeline (key dates)

Date	Milestone
2026-07-23	Product Architecture agreed (3 Voice lines, multi-tenant business)
2026-07-24–25	Voice Copilot MVP + real estate market search
2026-07-26	CEO Notion registry · Veliform Voice rebrand · 8-min call cap · HQ CI
2026-07-27	Launchpad spec v1 · Company Guide · org.yaml v2 (11 agents)
2026-07-28	This presentation · Finance Analyst registered
H2 2026	Voice Phase D — tenant #2 (Maya / real estate)
H2 2026	Launchpad public beta + billing

Slide 13 — Active plans (HQ Plans rail)

Plan ID	Title	Status	Target outcome
voice-phase-d	Second business tenant (Maya)	Building	2 verticals, 1 onboarding flow
copilot-server	Dedicated Copilot deploy	Planned	Separate Railway service
hq-v1	Company HQ dashboard	Live	Internal + demo of WeOffice UX
agent-company-saas-discovery	WeOffice MVP	Building	First paying SaaS customers

Slide 14 — How profit flows (summary)

Veliform cost base: ~\$5–15/mo Railway today → scales sub-linearly with tenants

Slide 15 — KPIs to track

KPI	Baseline (Jul 2026)	Target (Dec 2026)
Live Voice business tenants	1	5+
Concierge → paid conversions	0 (pilot)	3–5
Launchpad: URL → test call	Partial	< 5 min E2E
GA4 <code>ai_consultation_completed</code> / mo	Track in GA4	+50% vs Q3 baseline
WeOffice beta orgs	0	10 or 1 paid partner
MRR	\$0 (pre-billing)	First \$1K MRR
Railway infra / tenant	~\$5–15 total	< \$3 marginal per tenant

Slide 16 — Three-layer ops (how we run lean)

Layer	Tool	Question	Update cadence
Tasks	ClickUp	What to do?	Daily
History	Notion CEO	What happened?	Per git push + agent runs
Live view	HQ	How does the company look now?	~30 sec

Result: 1 founder + **11 AI agents** operate marketing, finance pulse, voice, and CEO logging without a large headcount.

Slide 17 — Competitive wedge

Competitor type	Examples	Veliform difference
Voice AI	Dialzara, etc.	Launchpad: website first , hear agent in 5 min
Agent SaaS	Agent.ceo, Agentyfy, Preplex	We ship real agents internally (SEO, GA4) — not slides
DIY automation	Zapier, n8n	Company metaphor — hire Rose, not "configure a node"

Documented wedge options (WeOffice): out-of-the-box SEO+GA4 agents · simpler than Agent.ceo · usage-based pricing

Slide 18 — Ask & next steps

For investors / partners

- Veliform is **pre-revenue, post-product**: live voice demo, live site, automation agents running
- **Near-term**: close paid Voice pilots · ship Launchpad · WeOffice Stripe v4
- **Proof point by Dec 2026**: 5 Voice tenants + \$1K MRR
